Cardiovascular System Questions And Answers

Answer: four. The average human heart has four chambers. The right side of the heart has the right atrium on top leading to the right ventricle. The left side of the heart has the left atrium on top leading to the left ventricle. Typically you would not have a opening between the two atria or the two ventricles.

Cardiac/Vascular Nurse Exam Practice Test (2020)

7. What are the advantages of a closed circulatory system over an open circulatory system? A closed circulatory system is more efficient. Since blood circulates only inside blood vessels, it has a higher pressure and, as a result, can travel greater distances to the organs where hematosis happens and to peripheral tissues.
