The service life for a marine engine may range from 500 to 600 hours, while that of a 1,000 hp-plus engine might only be 200 to 300 hours. Some marine engine builders recommend freshening up the valve springs and hydraulic roller lifters after 200 hours of use. It's imperative that marine engine builders build and rebuild these engines perfectly.

Common Marine Engine Issues - Engine Builder Magazine

Unlike a check engine light, a maintenance required light is based strictly on a car's mileage and when the light was previously reset. A qualified service technician can diagnose the car's maintenance needs and provide the necessary services, such as changing the engine oil and oil filter or providing a general vehicle inspection.

What Does the Maintenance Required Light Mean? - A+ ...

Message "Engine System Service Required" is always on with red triangle light. No other warning lights are on. No codes come up on the OBD-2 code reader. All fluids are full. Engine seems to be running fine. Throttle is a little bit jerky when starting off from rest, but normal at all other speeds.

Resetting Engine System Service Required message

You can reset the maintenance required light yourself if your mechanic does not reset it or if you perform the maintenance yourself. Step 1. Turn the ignition switch to the "On" position but do not crank the engine. Step 2. Press the odometer button until the total mileage shows on the display. Step 3. Turn the ignition switch off.

How to Reset the Maintenance Required Light for a Toyota ...

It took awhile, but I soon saw a wet area on the block. I had to remove a few brackets to get a better look, but I found a hairline crack in the block. It expanded when the engine warmed up. I logged onto the Honda technical website, and discovered that there was an extended warranty on the engine block for certain VIN numbers.

2004 Subaru STI Staged Engine Blocks - IAG Performance

I concur the 2.5L Subaru engine (non-turbo) has head gasket issues from 1996-2004(not present). However they seem to have stopped in 2005 where the engine design changed a bit. This is even evident in Consumer Reports which shows major engine problems for all the models (except turbo) only up to 2004. The major engine problem is the head gasket.
