This has rapidly increased the use of glass in facades. By using steel as a load bearing structure, it is possible to keep the transparency restricting structures slim. The aim of this master's thesis is to gather together information on research, design and codes about the structural design in steel-glass facades.

Structural Design of a Glass Facade | glassonweb.com

Closed Cavity Façade by Skidmore, Owings & Merrill LLP (SOM). Semi-Unitized Systems: Semi-unitized systems combine some of the advantageous features of both stick and unitized curtain wall systems. Unlike stick systems, where glass delivered to the construction site on its own, each piece of glass is pre-bonded into a smaller metal cassette that is eventually locked into a larger frame on site.
