The IBM Palm Top PC 110 (commonly just "PC110") is, as its name suggests, a palmtop PC intended for sale exclusively in Japan. It was produced by a joint venture between IBM Japan and Ricoh, known as RIOS. In a nutshell, it's a 486 notebook that fits in your hand. It is a late entry in the 486 market, launching in 1995, though development appears

The IBM PC 110 is a palmtop computer that's roughly as wide and tall as a VHS Tape, and half as long. It was released in 1995 in Japan Only. It has a lot of oddities for the time, such as the ability to use a camcorder battery to power the unit, and a telephone feature where you literally plug the unit into a phone line and hold it up to your ear and mouth to talk.
